

STUNNING TIMBER POOL ROOM, BERKSHIRE

A timber poolside room with many additional features.

We received a rare private pool house commission to create a stunning yet practical space that could be equipped for many uses. Never one to shy away from a challenge, we threw ourselves in - with fantastic results.

Ref: OUT1

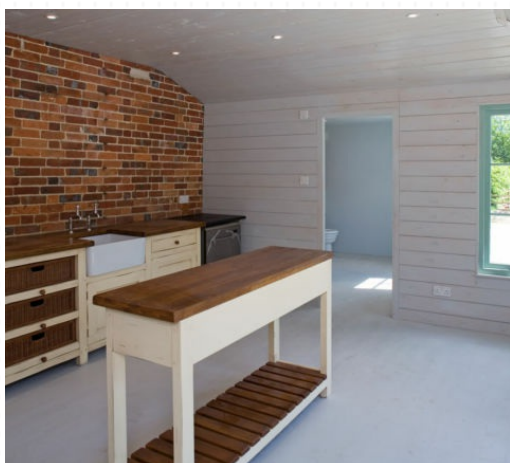

Client **BRIEF**

Our client wanted a beautiful poolside room to serve as a convenient, bright place in which to relax, change and entertain their guests. The room needed to have plenty of storage space to accommodate the people using it and the objects surrounding the poolside, too, such as chairs and tables, so that they could be packed away safely in rainier seasons. The room was also to contain useful facilities, such as toilets, so that people would not have to journey back to the main body of the house for their needs.

Our SOLUTION

We created a beautiful poolside building following the client's brief, embellishing it with plenty of gorgeous, attractive finishes that included featheredge cladding, oak posts, French doors and a pristine, tiled roof. The room was painted in a beautiful mint colour that gave it a very bright, inviting feel, ensuring it was aesthetically striking against the brick wall behind and surrounding grass and water. We left a brick accent wall on the inside, too - a lovely contrast piece that added a fantastic extra dimension.

The RESULT

An aspirational build which both the customer and our team are proud of.

"The Stable Company were efficient, the standard of work was top-class and they produced a yard that was not only a pleasure to work in but looked so smart. We were so pleased with the job we called them back in for our pool house as well. I would HIGHLY recommend this company."
