

Trees Through the Seasons

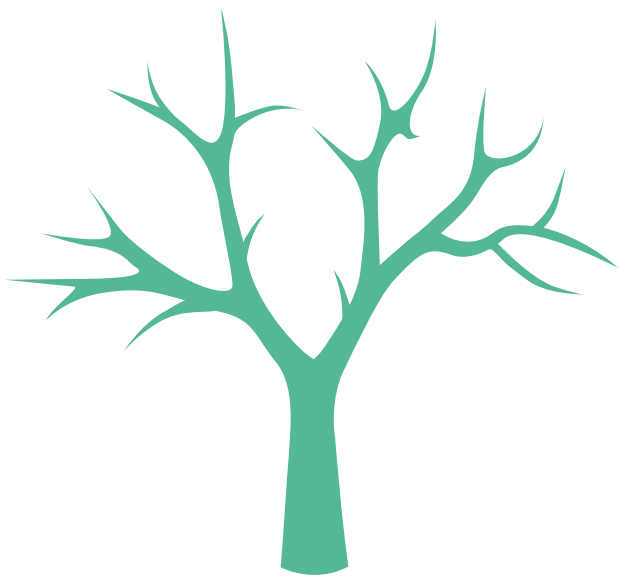

Apple trees can change through the seasons, can you draw what happens to the tree in Spring, Summer, Autumn and Winter?

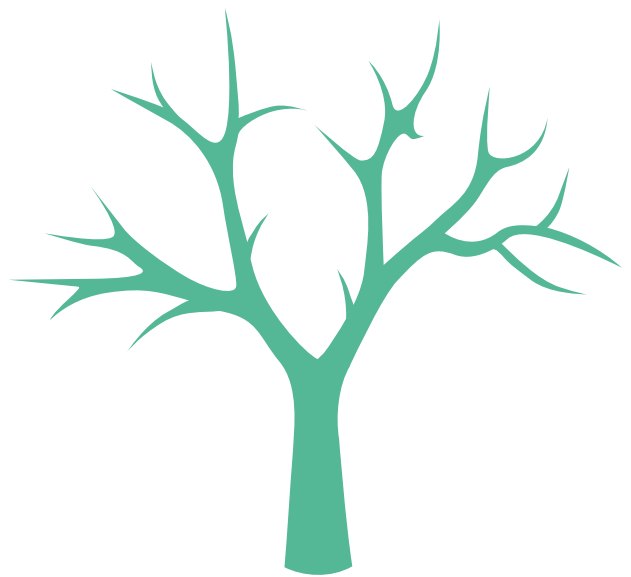

In Spring the tree sprouts leaves and flowers.

In Summer the flowers start to grow fruit in them, these will grow in to the apples we buy at the shops.

In Autumn the apples are nice and ripe, so are picked or fall onto the floor. The leaves are now turning red and orange!

In Winter the trees take a rest and havetno leaves at all! When it snows, people play together and build snowmen, can you draw one under the tree
